- **Dr. Hsiang-Yong (Sean) Yu, from NRL, has just accepted a two year assignment at ARO-FE?** Dr. Yu holds a Ph.D. in Materials Science and Engineering from the University of Rochester. Some of Dr. Yu's current research activities include Strain Induced Quantum Wires, Optical NDE, and Mechanics of Composite Structures with active fibers. Dr. Yu has more than 50 scientific publications to his credit; has been Prof. and Head of Department of Applied Physics at the Taiwan Chung Cheng Inst. of Technology and has served as reviewer for several professional journals. ARO-FE is confident that “Sean” will assist ARL/ARO and the Army R&D Centers in keeping pace with current trend and increasing needs for materials for advanced technologies.
- **You can select the areas of research pursued by ARL/ARO and find out the ARO-FE role in enhancing them by just clicking the area of interest?**
